

What Next?

The reason so many people are going to XM radio is that it is like satellite TV of radio. Variety is the spice of life and my wife and I love the fact of no commercials, childrens stations for our 5 year old and just the overall freedom of choice of the stations we like to listen too.

No offense NAB but since I put the XM Radio into my wifes Jeep in December she has not even listened to regular radio. I personally would like to hear local traffic and weather on XM.

Doesn't Washington have better things to worry about????

War in Iraq, decreasing unemployment and crime and punishment in our own country. I mean really how many people have been on death row for over 10 years and were paying for that.

This service is paid for not unlike Cable TV and NAB is not telling Bright House what programs to put on.

Even Satellite TV has added local stations to its lineup due to overwhelming requests.

Stop trying to worry about things that are not that important. People will still listen to the free broadcasts but XM Radio is freedom of choice.
